

Fig.1. Frequency distributions of net and acoustic densities based on the data from 119 standard double-oblique trawlings.
(solid line - acoustic densities; dotted lone - net densities)

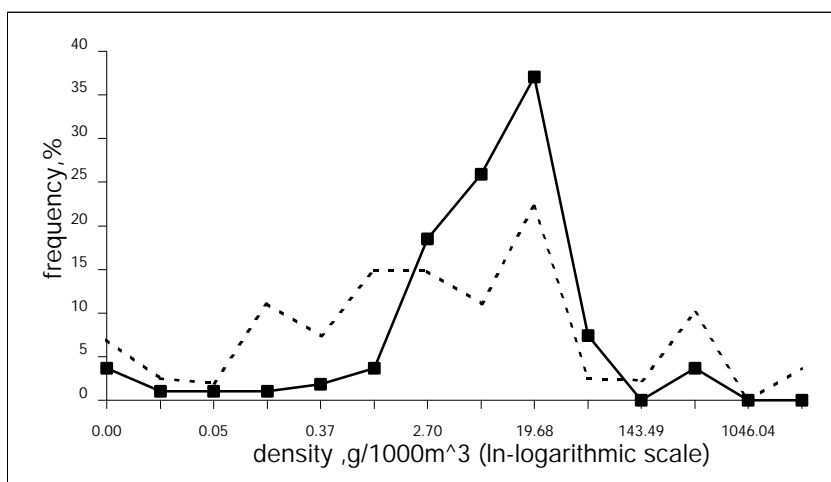

Fig.2. Frequency distributions of net and acoustic densities based on the night-time trawlings.
(solid line - acoustic densities; dotted lone - net densities)

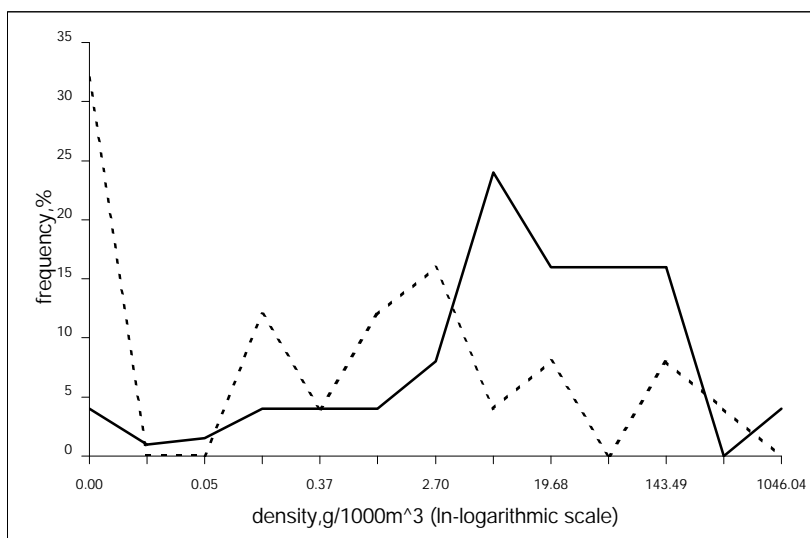

Fig.3. Frequency distributions of net and acoustic densities based on the daytime trawlings.
(solid line - acoustic densities; dotted lone - net densities)
